Gateway (T4S / T4EA)

Customer Brief

Germany based Hi-Tech, Automation and Heavy Machinery organizations of SIEMENS AG with several business units having various manufacturing facilities had a need to connect a central Teamcenter PLM to various SAP systems (including Spyridon).

Project Highlights

- Over 20+ SAP systems with over 40+ plants connected using T4S solution.

- Data transfers include MM, BOM, Change, Vendor, Manufacturer, Order and Process BOMs.

- Highly cost effective implementation with proven offshore and onsite model from Intelizign.

- Complete solution Architected and Implemented by Intelizign team of consultants and developers.

- Worked on latest version of Teamcenter and T4S (Version 11.x.x).

- Data, Process Integration along with Data views supported.

Customer Benefits

- Quick return on Investment as all the SAP systems connected to central Teamcenter system in shortest possible time using the generic solution framework setup by Intelizign based on T4S solution.

- One of the reference implementation for many customers of SIEMENS PLM.

- Cost benefit with onsite offshore based implementation.

- Feedback from such large implementation helped SIEMENS enhance the gateway product features.
