

Teamcenter Reporting and Analytics (TCRA)

Customer Brief

Germany based Hi-Tech, Automation and Heavy Machinery organization with several business units having various manufacturing facilities was looking for a reporting solution to cater to its requirements for various kind of reports in different and localized formats drawing information from centralised Teamcenter PLM and other legacy database systems.

Project Highlights

- Over 170 reports are available in 25 categories and used by more than 3000 users which include 100+ users concurrently using the solution.
- Over 300 users logged in per day to use the reporting solution. Daily up to 1200 reports are initiated by users.
- Monthly over 40000 reports created automatically via EMS.
- 3000000 objects fetched by TCRA (by users) per month.
- 2500000 objects fetched via EMS per month.
- Reports includes BOM, MBOM reports Item/Item Revision History Reports, Shop floor reports, Item/Item Revision Comparison reports, Signoff reports, Change Management/Change Order reports, Event Management System (EMS) reports, Initial Sample Inspection Reports (ISIR), Teamcenter Integrated reports.
- Highly cost effective implementation with proven offshore and onsite model from Intelizign.
- Implementation using latest version of Teamcenter and TCRA (Version 10.1.4).

Customer Benefits

- Reduced implementation time and cost using generic & reusable solutions.
- Enabled faster decision making through highly intuitive reports and business analytics.
- One view for data and information from Teamcenter as well as Legacy Data Warehouses.
- Reduced maintenance and upgrade cost by maximizing configurations and optimizing customizations.
- Cost benefit with onsite offshore based implementation.
